

SAMEER SHREENIVAS MITTIMANI

Product Manager | Data & Market Analytics | Financial Services

Chennai, Tamil Nadu, India | +91 94488 00299 | samsm@outlook.in

linkedin.com/in/sameersm | github.com/cercit | cercit.github.io/me

PROFESSIONAL SUMMARY

Twelve years at Sundaram Finance, an Indian NBFC, across auto finance, working capital lending, and national market analytics. Currently owns the enquiry lifecycle for retail auto across the branch network in India and turns Vahan vehicle-registration data into the OEM market-share reads that senior management works from. Launched Bulk Diesel Finance, a lending product that opened a customer category the region had not sold to before and beat budget every quarter it ran. Completing Product Management with Applied AI at iHUB DivyaSampark, IIT Roorkee. Looking for a product role where operational depth in financial services counts.

CORE COMPETENCIES

Product Management · Product Lifecycle Management · Go-to-Market (GTM) Strategy · 0-to-1 Product Launch · Product Discovery · Requirements Gathering · Roadmap Prioritisation · Stakeholder Management · Cross-Functional Collaboration · Data-Driven Decision Making · KPI Definition and Tracking · Business Intelligence and Dashboarding · Market and Competitive Analysis · Customer Segmentation · User Research and Field Discovery · Process Automation and Workflow Optimisation · Team Leadership and Training · Customer Relationship Management · Portfolio Growth · Risk and Regulatory Compliance · Change Management · Channel Partner Enablement

TECHNICAL SKILLS

Analytics and BI: Power BI, Advanced Excel (Power Query, pivot modelling), PowerPoint

Data and Query: SQL, MySQL (DML), Pandas

Programming and Automation: Python, Power Automate Desktop, Playwright, ReportLab

Domain: NBFC and Auto Finance, Vehicle Registration (Vahan / SIAM) Data, Working Capital Finance, Applied AI for Product

PROFESSIONAL EXPERIENCE

SUNDARAM FINANCE LIMITED | Non-Banking Financial Company (NBFC) | 12 years

Deputy Manager, Auto (National Retail Team)

Chennai | April 2024 - Present

- Own the enquiry and lead lifecycle for retail auto across the branch network in India. Track where leads enter, where they stall, and what the drop-off pattern says about market conditions and internal execution.
- Read OEM and segment market share from Vahan registration data across 36 states and union territories, usually before the shift reaches branch reporting.
- Built leading-indicator dashboards in Power BI and Advanced Excel for Associate and Field Officer productivity. They replaced monthly reports that only showed the damage after it was done.
- Consolidated scattered automation scripts into standard workflows now used by other teams. Manual processing time fell by 20-25%.
- Work across corporate leadership, regional sales, and dealer networks to keep national targets and field execution aligned. Visit branches regularly, because the reported data and the ground often disagree.
- Contribute to the internal Idea Olympics innovation programme.

Deputy Manager, Working Capital Finance

North Karnataka (based in Bellary) | April 2022 - March 2024

- Introduced Bulk Diesel Finance, the first scheme of its kind in the region. It opened a customer category the branches had not sold to before: fleet operators and bulk diesel buyers.
- Beat budgeted targets every quarter and grew the B2B portfolio to INR 10-11 crore in monthly disbursement.
- Ran the launch end to end: segmentation, scheme design input, branch staff training, and regional rollout.
- Turned oil company officials and branch teams into active channel partners. A product only moves if the people selling it understand who it is for.
- Tracked branch-level pipeline to catch stalls early and pointed field effort where it converted.

Branch Accountant

Bijapur, Karnataka | August 2015 - March 2022

Promoted from Cashier in April 2017.

- Managed payables, receivables, NPA tracking, and loan movement monitoring for the branch portfolio.
- Built a remote KYC and field investigation process over video during COVID-19 lockdowns, which kept loan origination running when branch operations stopped.
- Moved legacy borrowers from cash to digital repayment at a point when that was still a real behaviour change problem. Digital collection adoption rose 30-40%.
- Executed GECL restructurings for idle-vehicle borrowers and recovered NPA accounts through in-branch customer education camps.
- Coordinated repossession and asset sale, and issued regulatory notices.

Customer Support Executive

Shahpur | August 2014 - August 2015

- Assessed customer creditworthiness and ran loan processing from application through disbursement.
- Worked with compliance and internal audit. This is where process rigour started to look like a design requirement rather than a constraint.

SELECTED PROJECTS

Vahan Market-Share Intelligence | Power BI, Python, MySQL

A business-intelligence layer over India's vehicle-registration data. Reads OEM and segment share and flags movement early enough for senior management to act on it. Internal Sundaram Finance tool.

Automated OEM Report Engine | Python, ReportLab, Pandas

A scheduled pipeline that turns raw registration exports into board-ready reports with heatmaps, log-scale OEM comparisons, and year-on-year growth annotations. Replaced a manual process.

Vahan OEM Scraper | Python, Playwright (async)

State-wise vehicle-registration scraper running 12-core concurrency across Cars, LGPV, and 3W nationwide. This is the ingestion layer under the analytics above.

NIFTY Options Trading Bot | Python, Groww API

Breakout-strategy trading system built as a state machine around the 9:15 to 9:45 opening range.

EDUCATION

Certification, Product Management with Applied AI

iHUB DivyaSampark, IIT Roorkee | May 2026 - Jan 2027

Master of Business Administration (MBA), Finance

KLE's IMSR, Hubli | 2012 - 2014

Bachelor of Commerce (B.Com.)

Karnataka Arts and Commerce College, Dharwad | 2009 - 2012
